Bourns® Model CDDFN2-T3.3LC Surface Mount TVS Diode to be Discontinued

Due to circumstances beyond Bourns' control, we are unable to continue to manufacture the [Model CDDFN2-T3.3LC Surface Mount TVS Diode](#). The leadframe supplier transferred its business operations and discontinued supplying the leadframe required for this device. An alternative source is unavailable.

This obsolescence notice is effective immediately. Availability is limited to the stock on hand in our warehouse and at our distributors' warehouses. This device will no longer be available once this stock is depleted. Products purchased during this time period will be covered by Bourns' standard warranty.

Bourns will be releasing a replacement device, the Model CDDFN2-T3.3B in October, 2013. The electrical specifications of this replacement device are very similar to those of the Model CDDFN2-T3.3LC with an improved, slightly lower clamping voltage. The package pad dimensions are slightly different and are shown in the figure below.

DIMENSIONS: $\frac{\text{MM}}{\text{(INCHES)}}$

We regret that replacement products are not offered at this time. Customers must notify Bourns in writing within 30 days of receipt of this notification if they consider the discontinued product to be "sole sourced" by Bourns. In such cases, Bourns will work with customers to negotiate an appropriate end-of-life purchase for the discontinued products.

Should you have any questions or need additional information, please feel free to contact [Customer Service/Inside Sales](#).
