1. Purpose

C&K, as design and manufacturing company for micro-miniature tact switches, is constantly looking to improve the manufacturing means and processes in order to continue serving its customers with the highest performance level.

As part of this continuous improvement policy, in order to avoid contamination, we are stopping the ink jet marking on top of the metal cage for KSS, KMS and KSU series.

2. Overview

Today, all KSS, KMS and KSU have an inkjet marking related to the date code and the version number:

This marking induce a possible risk of pollution and contamination on the assembly lines. The date code is also located on the label affixed to the plastic flange of the reel so traceability is ensured like all the other C&K products.

3. Impact of Change and Qualification

3.1 Impact of Change - None

3.2 Qualification – Not applicable
